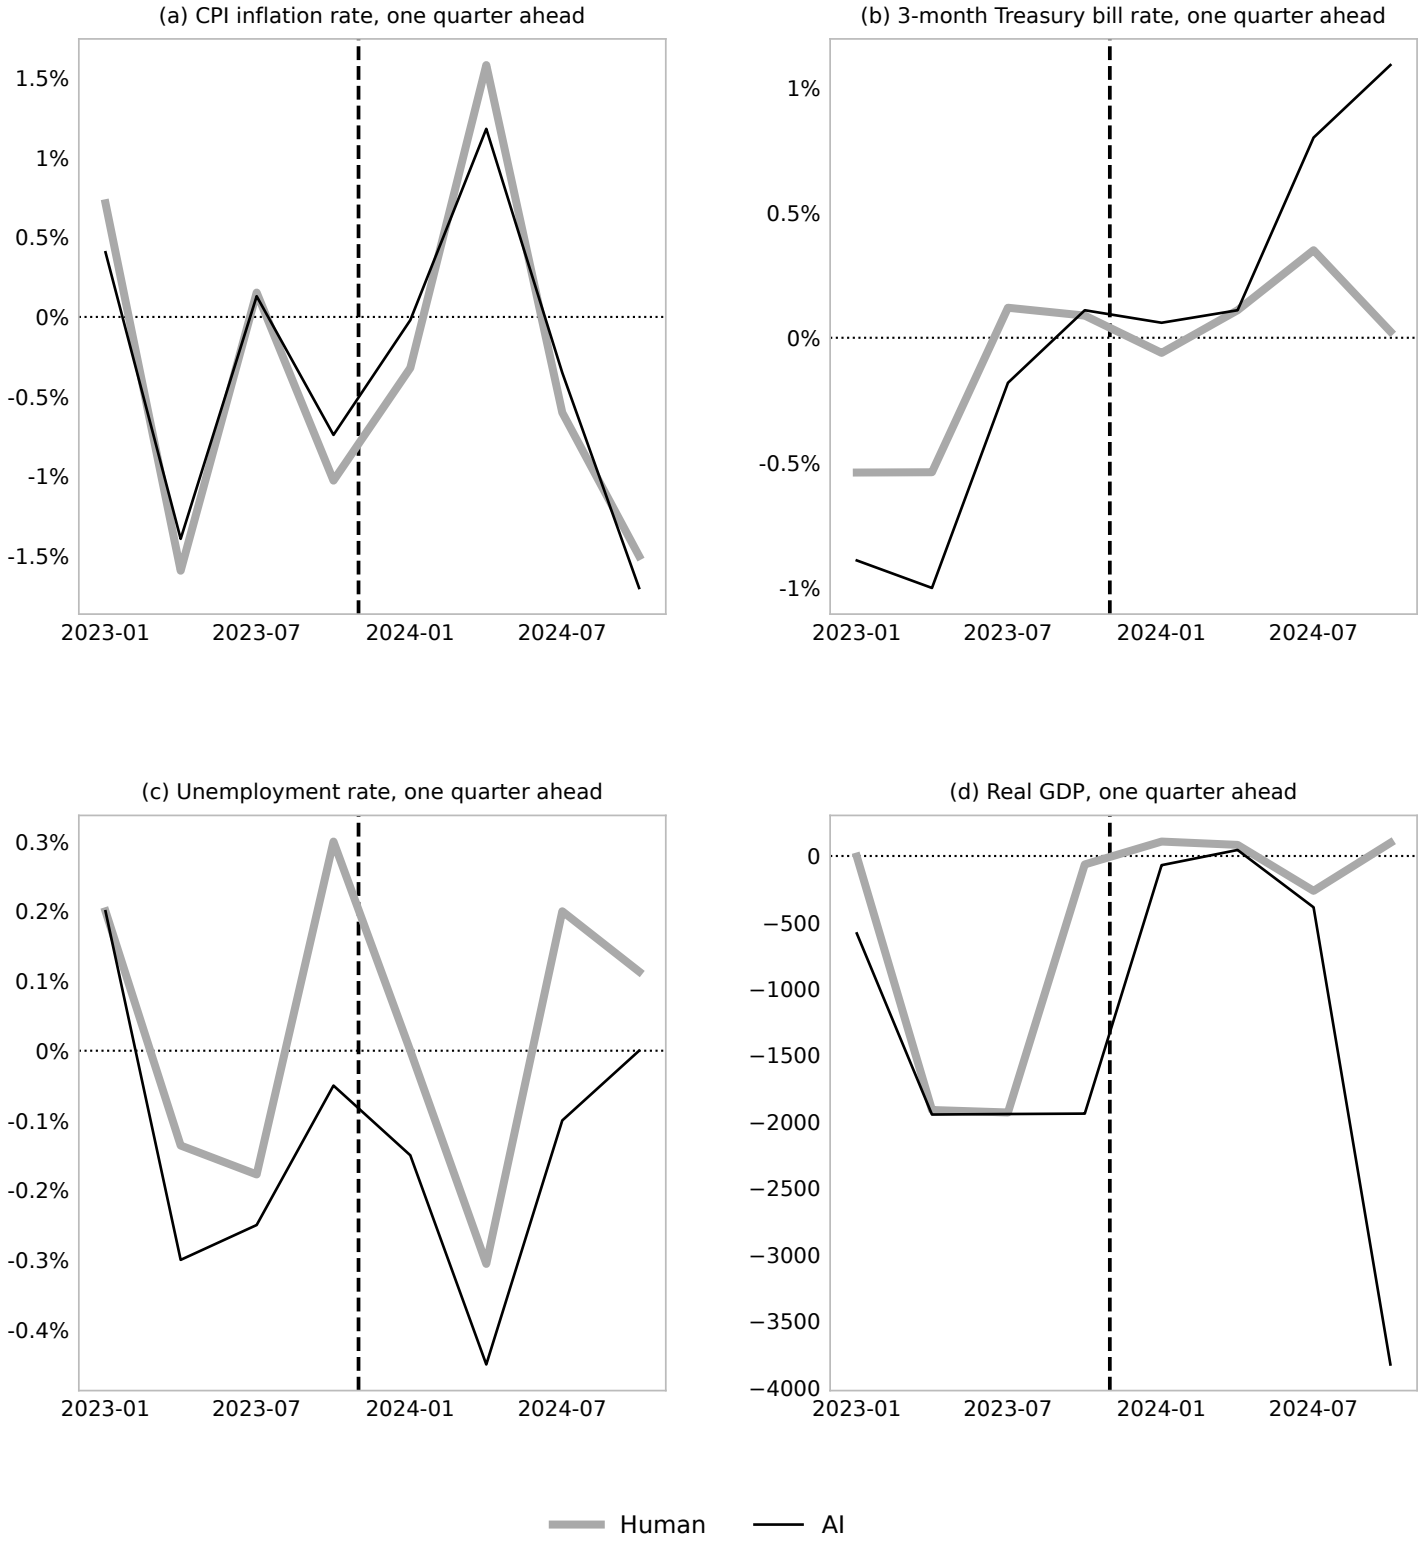
Figure 6. Median forecast errors around the training cutoff

One-quarter-ahead median forecast errors. The dashed line indicates October 2023, the stated GPT-4o mini training-data cutoff.



Out-of-sample run, including its 2023 survey quarters. Errors use the supplied R rule: median forecast, clipped to realized mean ±3 SD, less realized value. Display starts at 2023Q1 to match the final PDF.
